Columbia State Community College
Southern Regional Technology Center

The Southern Regional Technology Center — a partnership between Columbia State Community College, TCAT Hohenwald and TCAT Pulaski — serves as a regional hub for education and training to meet the needs of both citizens and employers.

Through strong partnerships built around internships, apprenticeships, program development and job placement, pathways include diplomas, technical certificates and associate of applied science degrees. “This is the first of three introductions to some of the opportunities that exist within the SRTC,” said Bethany Lay, Columbia State vice president for advancement and executive director of the Columbia State Foundation. “We want students and the community to benefit from this facility!”

BMC Metalworks Welding Technology Lab

The BMC Metalworks, LLC Welding Technology Lab houses state-of-the-art equipment for instruction. It provides necessary hands-on learning using various welding processes such as gas metal arc welding (MIG), gas tungsten arc welding (TIG) and shielded metal arc welding (SMAW), leading to high-demand careers.
